

Photo Assignment # 2: Take a set of 25 pictures that document academic life at Middletown High School

North. Photograph several different types of subject matter related to student life, events, or other activities (See the list below for specific categories of this type of photograph.) *Excellent photographs completed for this assignment could potentially be selected for inclusion in the yearbook or other school publications. (Please note: If you plan to use a photograph of a recognizable individual for publication it may be necessary to obtain written permission from that person in advance of publication for such usage. It is good practice to write in your log book the name of anyone you photograph and an address or other place where that person may be contacted if a model release should be required at a later date.)*

- Use your creativity and imagination to produce aesthetically pleasing and original compositions.
- You may elect to use either a film camera or a digital camera to complete this assignment.
- If you are using a digital camera, when you have finished taking all 25 photos, transfer your images from your digital camera or cell phone camera to your USB.
 - If you are using a film type camera, when you have finished taking all 25 of your pictures, remove the film from your camera, use a changing bag to load it into a light safe developing tank and develop and dry the film according to instructions given in class. Cut your negatives in sets of 5 frames, insert the negative strips into an archival storage page, label the page (with your name, class period number, and assignment title) and put it into your photography notebook. Scan all 25 negatives & save the files onto your USB.
- Use Adobe Bridge to create a digital contact sheet.

Academic Life Photos fall into several general categories. You must document at least 4 of the following categories:
