

HOME GUIDANCE FOR USING IMAGINE LEARNING

Imagine Learning Language Literacy and *Imagine Learning Math* are interactive learning platforms that provide students opportunities for participation in standards-aligned, personalized learning pathways within a gamified environment.

Getting Started...

- Students will log into both *Imagine Language and Literacy* and *Imagine Math* programs through Clever, the district's single sign-on application, just like they do now when logging into programs such as Dreambox. Students will not need a username or password. See the links below which detail how to support your child in accessing these programs from various devices through the Clever application.
 - [Video for Accessing Imagine Learning ELA and Math via Clever](#)
 - [Screenshot Directions for Accessing Imagine Learning Language and Literacy and Math via Clever](#)
- Both programs will begin with students taking a short diagnostic assessment. This will put the child on a personalized learning pathway based on their results. It is very important that you allow your child to participate in these assessments independently **without assistance**. However, technology assistance may be necessary during the first few logins, especially with our younger learners.

Below are the minimum time-on-task expectations with Imagine Learning, based on grade level. The revised elementary virtual schedule includes suggested time blocks for accessing Imagine Learning on Tuesdays and Thursdays. Students can always use the program more than what is suggested below.

	Language and Literacy	Math
K/1	30 minutes	30 minutes
2/3	40 minutes	40 minutes
4/5	50 minutes	50 minutes

Technology Assistance Points of Contact

If your child has difficulty logging in through Clever, please contact the Educational Technology Specialist assigned to their school.
