

We believe technology can be a powerful tool for enhancing student achievement and preparing them for their future. Over the past three years, Middletown Township Public Schools has implemented a one-to-one digital initiative that provides a Chromebook for every student in grades three through twelve. The use of these devices in the classroom has allowed us to begin creating student centered, personalized learning environments that empower our students to be well-rounded, contributing members of our technology infused, quickly changing global community.

Being able to connect online outside of the school day allows our students to truly have anytime, anywhere learning opportunities and is paramount in ending 'bell-to-bell' learning schedules. We are hoping you will join in our efforts to closing the digital divide for the children we serve! We would like to speak with you, at your convenience, about becoming a "MTPS Community Connects Wifi Partner". This would require a very minimal time commitment and comes at no cost on your part. Becoming a partner could increase your customer base, while making a *huge difference* in our efforts to increase student access to information.

Please take a moment to read over and complete our partnership form using the following link: <http://tinyurl.com/MTPScommunityconnects>.

Once the form is completed, you will be contacted by a district representative who can discuss, in detail, how you will be providing enriching learning experiences for our students anytime, anywhere while promoting your business. Thank you for your consideration and we look forward to scheduling a time we can meet and discuss how you can become part of this worthwhile partnership for students in Middletown Township Public Schools.

William O. George III, Ed. D.
Superintendent of Schools
Middletown Township Public Schools
