

Locally Sourced Produce

Middletown Township Food Services has partnered this year with the Department of Defense and Seashore Produce. Through this partnership we are able to purchase produce grown in New Jersey farms and incorporate these fruits and vegetables into our students menus. Monthly we receive communications of what we are able to buy in state and then our team of chefs go to work. We are proud to support our local farmers, we truly believe New Jersey has some of the best grown produce in the country.
