

William O. George III, Ed.D.
Superintendent of Schools
Middletown Township Public Schools

Educational Values

Schools should:

1. Inspire and motivate children to maximize their potential.
2. Provide opportunities that reinforce life-long learning, emphasize critical thinking, problem-solving and creativity for all stake-holders in our school community.
3. Prepare our students for the diverse workforce opportunities of the future.
4. Honor the individuality and uniqueness of each child.
5. Start with the truth that all children can learn.
6. Foster a respect for personal and cultural diversity and the dignity of each member of the school community.
7. Protect each student's right to equal access to educational opportunity.
8. Create professional development opportunities for staff that are personalized and model lifelong learning.
9. Inspire innovation as an expected outcome of student learning.
10. Implement initiatives as achieved through collaboration and clearly defined best practices.
11. Differentiate instruction through planning, preparation and regular assessment of all student performance as a guide to the delivery of instruction.
