

Math Empowers for Parents

DO MATH TOGETHER

1. Cook & bake on rainy days.
2. Design a family garden.
3. Establish a savings account.
4. Help plan a family vacation.
5. Design & build a birdhouse.

DreamBox, an online, adaptive learning resource, will continue to be available to your child over the summer. Since DreamBox is an online program, there is no software to download. All you need is a high-speed Internet connection and Adobe Flash. DreamBox is iPad compatible as well. Download the app and enter the school code, and your child will continue to play right where he/she left off on the last day of school. Log in at <https://play.dreambox.com/login/kc58/>.

TAKE A TRIP TO THE

NATIONAL MUSEUM OF MATHEMATICS

The National Museum of Mathematics is the coolest thing to ever happen to math! It is located in Manhattan and is open from 10:00 a.m. to 5:00 p.m., seven days a week, 364 days a year. (MoMATH is closed on Thanksgiving.) Their dynamic exhibits, gallery, and programs will stimulate inquiry, spark curiosity, and reveal the wonders of mathematics for children ages 5 – 105! MoMath presents *Family Fridays*, designed to bring families together to enjoy an array of engaging mathematical activities. Activities are designed so that all attendees, regardless of age, can participate on an equal footing. Check out this FREE program on Fridays and all of the other wonderful happenings at <http://momath.org>.

“Parents Are Their Child’s First Teachers”

Children are naturally curious and therefore are always asking questions. Families that dread the question, “Are we there yet?”, should instead use this as a learning opportunity. Math isn’t for the classroom alone. It is around us in every aspect of our world. Any time we solve problems, we are applying mathematics skills.

The PBS website is filled with resources to help parents navigate through the many years of parenting, including suggestions to help children extend math learning outside the classroom. Click on the link below with tips to help your child apply math concepts to everyday interests and experiences.
